

Activity-4

Topics Covered: Menus & Toolbars, Dialog Boxes, Component Organizers, **Advanced Components**

1. Explain the process of menu creation in Swing. Include JMenuBar, JMenu, and JMenuItem.
2. Explain dialog boxes in Swing. Discuss OptionPane, custom dialogs, file chooser, and color chooser with use cases.
3. Explain JSplitPane and JTabbedPane with suitable examples.
4. What are JDesktopPane and JInternalFrame? Explain their use in MDI applications.
5. Explain the use of JList and JTable in Swing applications.
6. Explain component organizers in Swing: JSplitPane, JTabbedPane, JDesktopPane, and JInternalFrame. Discuss their role in complex GUI applications.
7. Design a file explorer interface using Swing. Explain how JTree, JTable, and JScrollPane work together.
8. A desktop application needs multiple internal windows. Explain how JDesktopPane and JInternalFrame can be used to implement this.
